Projects

Personal website & Portfolio – <https://lailas-portfolio.netlify.app>

- A personal website to display all my web projects and my skills as a developer.

Smart Security System – Graduation project

- An AI powered camera and microphone built to detect several sorts of danger such as theft, violence, arson, etc.
- Also has the feature of streaming the footage to the user's phone as well as notifying the user when danger is detected
- My role consisted of full stack development of the mobile application as well as database design and implementation.
